

Great British Beach Clean & Source to Sea

Get started with our step-by-step guide:

Step 1

Inspire your group to get involved by completing our activity suggestion exploring how litter reaches the ocean and how litter affects wildlife.

Step 2

Head out on a group litter pick and record what you find by using either our [beach clean form](#) for coastal cleans or our [Source to Sea Litter Quest form](#) for inland cleans.

Step 3

Add your data to our national [Beachwatch](#) or [Source to Sea](#) databases.

Step 4

Share photos of your experience online using @mcsuk, #LitterQuest or #GreatBritishBeachClean

Step 5

Complete our post-litter pick activities with your group to inspire them to take further action to tackle marine litter.

Further information and activities for [groups](#) and [primary & secondary](#) schools can be found on our website at [mcsuk.org](https://www.mcsuk.org)
